Skills

Frontend: HTML5, CSS, JQuery, Javascript, Bootstrap, Bulma, ReactJS

Backend: MySQL, MongoDB, Express, Node, Handlebars

Projects

Homemade Taste | UCSD

- Built an App that shows dishes made locally in your area that you can purchase independently
- MERN Stack - Was originally assigned with the backend development, but pretty hands on with both frontend and backend.

Book Search Engine | UCSD

- Built a Google Books API search engine with a RESTful API and refactor it to be a GraphQL API built with Apollo Server
- MERN Stack - React front end, MongoDB database, and Node.js/Express.js server and API.

Text Editor | UCSD

- Text editor that runs in the browser as a Progressive Web Application.
- Implemented methods for getting and storing data to an IndexedDB database.

Social Network API | UCSD

- An API for a social network web application where users can share their thoughts.
- Utilized Express.js for routing, a MongoDB database, and the Mongoose ODM.

Tech Blog | UCSD

- A CMS-Style blog site similar to a Wordpress site, where developers can publish their blog posts and comment.
- Followed the Model-View-Controller paradigm in its architectural structure, using Handlebars.js as the templating language, Sequelize as the ORM, and the express-session npm package for authentication.

E-Commerce Backend | UCSD

- Built the back end of an e-commerce site by modifying started code.
- Configured a working Express.js API to use Sequelize to interact with a My SQL database.

Experience

Advanced Medical Supply / Data Entry

January 2018 - March 2020, Carlsbad, CA

Responsible for typing in data provided directly from customers. Retrieve data from database or electronic files as requested. Basic understanding of databases
